

International Webinar
**Residue testing in organic production: Investigations after
detection of phosphonic acid and its salts**

Tuesday 13 October, 2020

09:00 - 09:15	Participants logging in
09:15 - 09:20	Introduction and objectives of conference
09:20 - 09:45	Create a level playing field for all participants
	Fosetyl-AI : a fungicide with particular definition for lab reporting after analysis
	Phosphonic acid (and its salts) in soil and food products: overview of known sources
09:45 - 10:35	Case studies of investigations
	<i>Typical case from operator perspective</i>
	<i>Typical case from certifier perspective</i>
	Case related questions and answers <i>Core question: What is essential for a successful investigation?</i>
10:35 - 11:35	Investigations to ensure organic integrity: baseline requirements, options and limits
	Options and limits of the "official" investigation by authorities and certifiers
11:35 - 12:00	Break
12:00-12:30	The way forward Shaping improved precautionary measures and investigations
	Lessons learned and take-aways
12:30-13:00	Conclusions, short evaluation round and farewell

This conference is sponsored by the Alliance for Organic Integrity

Organisation: the Anti Fraud Initiative (<http://www.organic-integrity.org>)
